EM-2N PORTABLE BROADCAST TAPE RECORDER

FEATHERWEIGHT, EASY-TO-USE TRANSISTORIZED AUDIO TAPE RECORDER FOR FIELD WORK - PROVIDES PROFESSIONAL BROADCAST QUALITY

The ideal tape recorder for the newsman or interviewer in the field, the new SONY Tape recorder EM-2N is a fully transistorized, lightweight unit that uses standard, inexpensive batteries to drive the tape transport as well as power the electronic system. A unique DC servo motor guarantees extremely steady tape speed with minimum wow and flutter, while the counterbalancing flywheel permits highly stable operation in recording even while walking or in moving vehicles.

■ Weighs only 11 lbs. with batteries and tape ■ Operates for 5 hours continuously on one set of batteries ■ Completely transistorized with rugged printed circuit construction to withstand severe abuse in the field ■ full-track recording at 7.5 ips on a 5" reel ■ Erase head permits elimination of errors and re-use of tape ■ Extremely simple in operation, with VU meter to check recording level and battery condition ■ Shockproof aluminum case with convenient shoulder carrying strap

EM-2N TAPE RECORDER

SPECIFICATIONS

Recording: AC bias, full track
Tape speed: 7.5 ips
Reel: up to 5"
Recording Medium: 1/4 inch wide magnetic recording tape
Heads: record/playback
erase
Motor: DC servo type
Wow, flutter: less than 0.1% wrms
Rewind, fast forward: less than 120 sec. with a 600 foot tape
Harmonic distortion: less than 2% at 10 db above the normal recording level
Bias Frequency: 80 kc
Equalization: NAB (CCIR available if specified)
Signal to noise ratio: better than 57 db
Frequency response: 50-15,000 cps
Power supply: motor—8 D cells
amplifiers—6 C cells
Input Impedance: 600 Ohms—70 dbm
Weight: 11 lbs. with batteries and tape
Size: 8 1/2 x 11 1/4 x 4 (W.D.H.)

ACCESSORIES

1 reel SONY tape
1 empty SONY reel
complete set of batteries
Crystal earphone
Optional: SONY dynamic microphone (F-91) with jack and stand
